Amazon Web Services

Work Experience

Broadstreet Ads, Red Bank, New Jersey

Head of Software Engineering

Jan 2022 - Present

- Plan quarterly goals and priorities for the quarter.
- Oversee the full development cycle from concept to release to guarantee standards and quality and that it is moving the company in the right direction.
- Manage and define processes and documentation for the engineering team to produce repeatable and scalable results.

Lead Software Engineer

May 2018 - Jan 2022

- Develop features and fix bugs on a high volume web application that gets over 40M requests a day.
- Single handedly built a complimentary react native app that integrated with the company's product, from managing the design all the way through release on the app store and play store.
- Manage deployment process and devops issues to guarantee 99.98% uptime for all web services and products 24/7.

Mafia City LLC, Philadelphia, PA (Part Time Remote Work)

Full Stack Developer

June 2018 - Oct 2021

- Single handedly brought the project from an inoperable state months behind deadlines to its beta release after every other developer left the project.
- I worked with a team of developers to create an immersive gaming experience for over 2000 players.
- Used html5, css3, javascript, vuejs, nodejs, mysql, SQL as well as object oriented programming to create UI and core features for a massively multiplayer online game server, which was a modification for Grand Theft Auto 5.
